Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on March 8, 2004 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Casey et al. (US 2004/0151161 A1, hereinafter "Casey")

The applied reference has common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1, 10, 16, 17, Casey discloses a method for providing the communication of information services between customer premises equipment (CPE 120) and a source of information services (Control Point 128), comprising:

providing a demarcation device (108) at the customer's premises, wherein the demarcation device defines an interface between an external transport medium that is substantially external to the customer's premises and an internal transport medium that is substantially internal to the customer's premises (an isolation device serves to isolate the external transport medium from the internal transport medium; see paragraphs 25 and 26);

establishing a virtual private network (VPN) between the demarcation device and source of information services (VPN microserver 291; paragraph 90).

establishing a virtual local area network (paragraph 36 and claim 15).

Regarding claim 2, 10, microservers 291 are configured to route information sets received via transport medium 248 according to the type of telecommunication information in the set as well as any addressing information associated with either the set or the information it comprises (paragraph 91).

Regarding claims 3, 5, 18, note use of VLAN tags (paragraphs 36 and claim 15).

Regarding claims 4, 9, 11, 15, the internal and external transport media can be any cable, wire or medium capable of carrying telecommunication information, including twisted pair copper wiring, optical fiber, coaxial cable, wireless transmissions (paragraph 24).

Regarding claims 6-7, 12-13, 19, the service can include voice, data, video, etc. on demand (paragraph 40, last sentence).

Regarding claim 8, 14, 20, note utility monitoring and control (paragraph 83).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mansfield (US 2003/0035523 A1) show another interface device between a plurality of external lines and a plurality of internal lines. Phillips et al. (US 2005/0018653 A1) show a similar network device.
